## The 'Original' Ramsay Loft Ladder (AL) Cleaning and Lubrication Instructions

### Instructions

- Place a covering (e.g. cardboard) on the floor below the loft hatch to protect the flooring.
- Lower the ladder ensuring that the ladder feet sit on the flooring protector.
- Using a cloth and white spirit.
  - i. Clean out the grooves at the back and front of each stile of the female section marked 'X'.
  - ii. Clean the guides at the back of each stile of the male section marked 'Y'.
- Using the oil supplied with the ladder or any other light multi-purpose oil (e.g. 3-in-One) very lightly lubricate the grooves marked 'X' with only a couple of drops of oil in each groove.
- Fully raise and lower the ladder a few times to ensure free and proper operation.
- Wipe off any excess oil, store the ladder and clear up the flooring protector.
